(54) PLASMA DISPLAY PANEL

(57)Abstract:

PROBLEM TO BE SOLVED: To achieve high reliability of a plasma display panel.

SOLUTION: By coating a display electrode 12 or an address electrode 22 formed on a glass substrate with an SiO₂ layer 13a by decomposition of polysilazane, a dielectric glass layer 13 can be formed thin while securing dielectric strength, rise of discharge voltage can be restricted, and a plasma display panel of high brightness can be provided.

LEGAL STATUS [Date of request for examination] 04.07.2000

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3414236

[Date of registration] 04.04.2003

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
